## Our Policies and Procedures continued...

# Ensuring our supply chains are robust

At Webhelp UK, we work with different suppliers to provide customer solutions for our clients. We have a strong framework in place to ensure the suppliers we work with are competitive within their marketplace and conduct their business' in an ethical manner.

## **Procurement Policy**

Webhelp is dedicated to ethical, sustainable and environmentally safe business practices and services. Our procurement policy requires our contracted suppliers at all times to conduct their business in an ethical and socially responsible manner, comply with all applicable laws, regulations and standards, have the rights and best interests of the supplier's employees (including the working conditions), the impact of the supplier's business on the environment and the role in its local community.

#### **New Supplier Process**

At Webhelp, we continually monitor and take steps to reduce supply chain risks, where it is a mandatory requirement for all suppliers to either complete the New Supplier Questionnaire or sign our Supplier Declaration.

The business is enabled to undertake some procurement activity directly with support from the procurement department. A supplier justification form is to provide details on why each supplier is selected. Webhelp requires a minimum of 3 quotes are gained where possible to ensure sufficient competition is being consistently introduced to all supply chain choices.

Webhelp's procurement department leads or supports all tenders which ensures robust, fair, consistent and ethical tendering activity. This is achieved through the use of templates and processes which focus on the responses provided by suppliers to develop a recommendation for supplier selection based on key business drivers.
